FURTHER EXPLANATION IF NEEDED: see 382 cross definitions.

The "avatar" is a graphic representation of a user. If not 345/302, consider 345/115, but it does not include graphics & multimedia. If a case includes both graphics & images, it defaults to 345. The claimed "rich media" is diverse media to multimedia. Video conference, for example, synchronizes video and audio and other images. Claims 13-14 concern tracking a user with no details of facial recog. Claim 10 similarly includes a nominal recitation of audio.
